

# ARTICULATED PIPEWORK

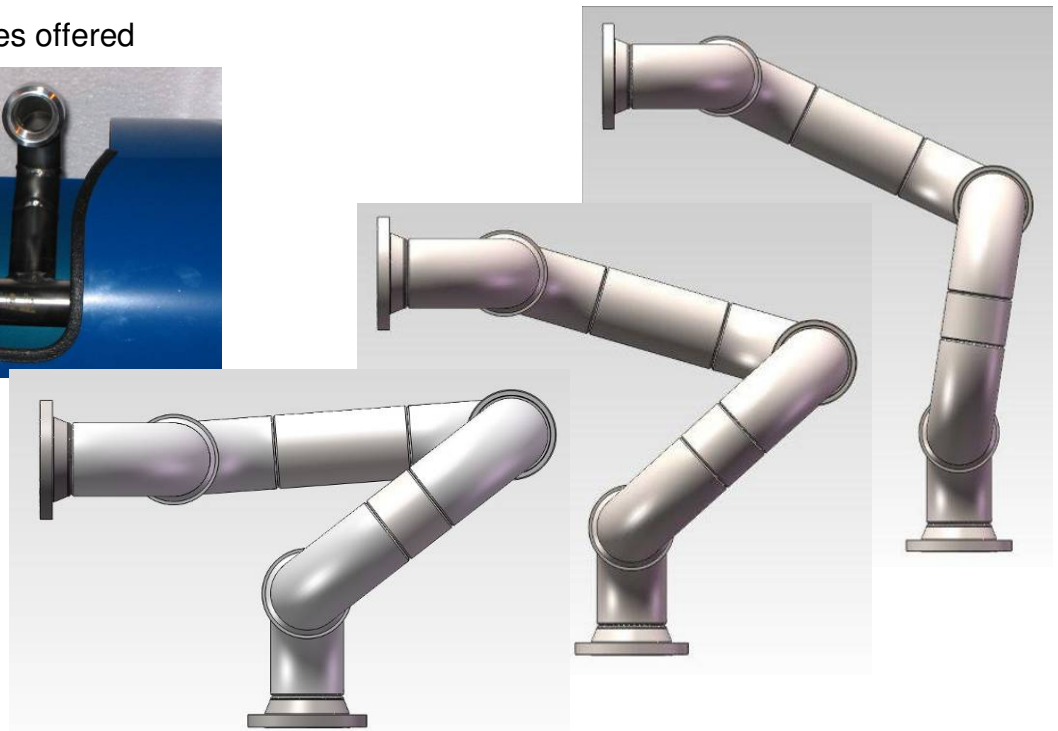

## NOMINAL BORE 1" TO 24"

- Taking swivel joints from the SK and large bore range we are able to offer bespoke articulated pipework to fulfil your requirements.
- Normally constructed from either carbon steel or stainless steel although other materials are available.
- Incorporating Rotaflow's proven and robust double roller, PTFE sealed swivel joints see 'SK series' and 'large bore' swivel joint pages for details.
- With the option of modifying the swivel joints for submerged duty, high or low temperature, sealed for life, hygienic use and much more.
- Various mounting and lifting points can be incorporated if required
- A range of paint finishes offered

Single port, hose reel swivel. Multiport hose reel swivels available incorporating mounting bearing if required.

Please contact Rotaflow to discuss your application.
